

...september 14, 2010...

**quantum physicists now claim
that the illusions we call time
are really piled movie-frames
that we pretend to slip between**

**so maybe – as i'm walking home
up from hornby to burrard
i could meet myself reversed
peering through a hole of time**

**and all the autumn halfway leaves
bordering the car tossed streets
could shift me – somehow – into spring
with summer dancing at my feet.**
