

A full moon is visible on the left side of the image, set against a dark, starry night sky. In the upper right and lower portions of the image, there are colorful nebulae, with the lower ones appearing in shades of orange and red.

...april 20, 2018...

*breathing in and breathing out the moon
i'm slowing down and slowing down again –
watching the landscape merge into a night
illuminated by an orchestra of stars –*

*is this a new beginning or a middle?
or some end where all waits to begin?
silver-shadowed breezes twirl and spin
playing me like fragments of a song –*

*faster now and faster – ancient winds
swirl me into a nebula
of lost and found unwinding memories
aspiring to dreams of symphony –
and tossed beyond the realms of space and time
the moon and i are mingling into one.*
