

...july 26, 2025...

**we are the barbarians
boasting that we live
in a modern society
that kills off all the trees –**

**towers, highways, phones and cars
are labeled valuable
while flowers trees and butterflies
are killed off and dismissed –**

**we boast about intelligence
glued to computer screens –
ignoring the dimensions sipped
by hummingbirds and bees –**

**we trash the oceans – forests – plains
pretending that we're smart
like children being brainwashed into
believing wrong is right.**
